Ex. 4 - CBI

I know you are working on the changes to the Rad compilation report.

R2 and R3 compilations look good.

I did review the chem/bacteria compilation for week 1-5 and 3 supplemental. I have a few comments on the key. Hopefully they will not be too difficult to address:

- 1) need to hit return before "Validation Result Qualifier" definition to move it to the next line.
- 2) looks like you can get rid of some extra spaces between the definitions of "UJ" and "R"
- 3) definition of RL is cut off.

Otherwise it looks like you did a good job updating the key.

THANKS!
